Methods of Use

Primetake Birdscaring Cartridges are designed to be used in and around airports and airfields to help with control of bird movement and dispersal.

Description

The Extended Range Cartridge produces a slight green tracer and smoke trail during flight with a loud report. The Cartridge comes in a red plastic case with yellow top and has a range of 80m ± 10m (depending on environmental conditions) when fired at a recommended angle of 45°.

Performance/Safety

Cartridges should only be fired through a signal pistol sleeved to 12G. Not to be fired through 12 Gauge pistols or shotguns.

Range Safety Template available on request.

Articles should remain within the original sealed package and be stored within a temperature controlled environment of +5°C to +30°C; relative humidity should not exceed 70%. Storage outside of these conditions will not be warranted and may reduce the shelf life and lead to the articles not functioning as intended.

At Primetake we constantly review our products—all specifications are a guide and may vary so please check that the latest specification meets your requirements
