Methods of Use

Primetake Bird Scaring Cartridges are designed to be used in and around airports and airfields to help with control of bird movement and dispersal.

Description

The Shotgun Screech Cartridge fires a sub calibre tracer projectile emitting a high pitched screech during flight. The Cartridge comes in a black plastic case with a yellow top and has a distance of 70m ± 10m (depending on environmental conditions) when fired at a recommended angle of a 30°.

Performance/Safety

The cartridge is designed to be fired through an unchoked 12G shotgun. Not to be fired from a signal pistol sleeved to 12G or other pistol.

Range Safety Template available on request.

Articles should remain within the original sealed package and be stored within a temperature controlled environment of +5°C to +30°C; relative humidity should not exceed 70%. Storage outside of these conditions will not be warranted and may reduce the shelf life and lead to the articles not functioning as intended.

At Primetake we constantly review our products—all specifications are a guide and may vary so please check that the latest specification meets your requirements
